Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-2, 6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,345,176. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent and the application are claiming common subject matter, as follows: radio front-end circuit comprising at least two amplifiers, an input terminal of each amplifier to be connected to an antenna terminal of the radio, an output terminal of each amplifier being connected to a first input terminal of an associated mixer, a second input terminal of each mixer being connected to a local oscillator, and an output terminal of each mixer to be connected to an input terminal of an intermediate frequency amplifier, and a switch interconnected between the local oscillator and the respective second input terminal of each mixer to connect and disconnect, respectively, the local oscillator to and from, respectively, the respective mixer.

• Art Unit: 2681

Allowable Subject Matter

3. Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claims 3-5, prior arts fail to teach the circuit according to claim 2, wherein the control circuit is adapted to control the switch in response to at least one of signal strength and interference strength.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Wiedemann et al. (U.S. Patent No. 5,345,602) teaches a VHF radio receiver intended for mobile use.
- Oto (U.S. Patent No. 5,437,051) teaches a broadband tuning circuit for receiving multi-channel signals.
- Bose et al. (U.S. Patent No. 5,742,896) teaches a diversity reception apparatus with selector switching at superaudible rate.
